Sangacio

Hot item in Japan! Japanese-logo sneaker

Once you wear the sneaker made by “Sangacio”, you will find it as comfortable as custom-made. Since Sangacio was born in Japan in 2015, we’ve been particular about quality of our works. Every process like selecting leather, sewing, and checking is handled by professional shoe makers. Of course, we have to mention its most visually unique point, Japanese-logo which says “にゆ”. When Kazuki Maeda a producer of this brand was studying in Italy, he found charm of “Hiragana” and got an inspiration for this Japanese-logo. Now, because of this cute logo and its comfortability, Sangacio sneakers are getting popular through SNS and internet news.

【Features of Shoe Stretcher】

The sole is made for most compatibility with stepping on the floor for stability of standing or walking with this kind of shoes.

Moreover, at the tiptoes, the mold is designed for fitness with toes and tiptoes. The tiptoes are unmovable and you can walk easily.

【Features of Insole】

Generally, popular insole of canvas shoes has 2 mm – 3 mm thickness, but Sangacio shoes use soft Urethane with 5 mm thickness, covered with a bit swelling wool.

【Important point for selecting leather】

We don't select withered leather from armpit or abdomen, only the durable leather is selected for our shoes.

【Sewing・Attaching Sole】

For the perfect execution, every shoe is carefully and thoroughly made and checked by high-skilled shoemaker one by one.

Why don't you try Sangacio shoes made by high-skilled shoemaker?
